

# Education Plan

- Mature/High School Diploma
  - At your registration interview, a form will be completed to determine how you will proceed towards your Mature Student/High School Diploma. The form shows which credits you have already achieved and which you plan to take to meet your goal of achieving your diploma and preparing for future career plans. As you receive your marks in the courses you take, your plan will be adjusted to track your progress toward graduation. Please let the Registration Advisor know if your goal changes in case you may need to consider other course options. For example if you decide to enter a different post-secondary program – something that often happens as students discover new interests and talents – you may need specific prerequisites that can be substituted for the ones you selected initially.
- Assessments
  - In order to place students at an appropriate grade level where prior credits have not been gained, in-house assessments are completed.
- Course pre-requisites
  - Certain courses have a prerequisite entry requirement e.g. Grade 12 Pre-calculus Math has a prerequisite of Grade 11 Pre-calculus Math. Where the student does not have the prior credit, demonstration of prior learning in the specific subject by means of an assessment is an option. Check specific course information for prerequisite requirements.
- Alternative ways of completing credits
  - The following options may be available to students and will be discussed during the registration process:
    - Special Language Exams
    - Community Service Credit
    - High School Apprenticeship Program
    - Recognition of Prior Learning
